

SquadIn / WashedUp India — Native App Technical Specification

Complete blueprint for AI builders & engineers: Zero-confusion UI, React Native Expo stack, and Supabase backend.

1. The Core Tech Stack (Native Mobile + High Performance)

CROSS-PLATFORM

Mobile Core

React Native + Expo SDK 52+ (TypeScript). Compiles natively to iOS and Android.

Styling Engine

NativeWind v4 (Tailwind CSS). 100% smooth 60-120fps native rendering.

Backend & DB

Supabase (PostgreSQL + Realtime WebSockets + Row Level Security).

Hardware Access

Native Biometrics (Face ID), Camera Liveness, GPS & Push Notifications.

2. UX Philosophy: The "Zero-Confusion" Rule for Users

SIMPLICITY FIRST

1. Glanceable Cards

Every plan shows: Category Icon, Time, Venue neighborhood, and Progress bar (e.g. 3/4 spots filled).

2. The 4-Tab Bottom Bar

Strictly 4 tabs: **Explore** (Feed), **My Crews** (Active plans), **Chats** (Unlocked), **Profile** (Trust badges).

3. One-Tap Actions

1-tap to Join, 1-tap Fast Unlock (₹49), 1-tap Invite Friend (+1). Zero complex sub-menus.

3. Screen-by-Screen Interaction Specification

5 SCREENS TOTAL

Screen 1: Explore Feed (Home)

- Top Filter Pills:** All, Cafes, Sports, Concerts, Women-Only.
- Plan Cards:** Displays Title, Time, Distance (e.g. '1.2 km away'), Host verified badge, and live slot counter (e.g. [3/4] 3/4 Filled).
- FAB (Floating Button):** + Post a Plan.

Screen 2: Plan Details Modal

- Map Snapshot:** Verified public cafe/venue location.
- Attendee Bubbles:** Photos with Trust Badges (Work / ID Verified).
- Main Action:** Large primary button 'Request Spot (Free)'.
- Deadlock Breaker:** Secondary button 'Fast-Unlock for ₹49'.

Screen 3: Post a Plan (3-Step Modal)

- Step 1 (Category):** Selecting 'Dinner' auto-sets capacity to 4; 'Concert' auto-sets to 6; 'Trek' auto-sets to 8.
- Step 2 (Venue):** Google Places search restricted to public commercial cafes, turfs, malls, parks. (Private homes blocked).
- Step 3 (Safety):** Toggle: 'Women-Only' or 'Balanced Mixed'.

Screen 4: Group Chat (The Magic Screen)

- State A (Locked):** Grayed-out chat with countdown progress bar + 'Fast-Unlock' button.
- State B (Unlocked):** Full real-time messaging, icebreaker prompt, in-chat '+1 Invite Friend' button, and top 1-Tap SOS Share.

4. Design System & Theme Tokens

UITOKENS

Bg: Warm Cream #FAF7F2

Primary: Espresso #1E1B18

Accent: Amber #D97706

Unlock: Emerald #059669

Database Schemas, State Triggers & Hardware Hooks

Complete copy-pasteable PostgreSQL schema, auto-unlock trigger, and native hardware integration code.

5. Supabase PostgreSQL Schema (Copy-Pasteable)

DATABASE

```
CREATE TABLE profiles (id UUID REFERENCES auth.users PRIMARY KEY, full_name TEXT NOT NULL, avatar_url TEXT, work_email_verified BOOLEAN DEFAULT FALSE, id_verified BOOLEAN DEFAULT FALSE, karma_rating DECIMAL(2,1) DEFAULT 5.0, created_at TIMESTAMPTZ DEFAULT NOW()); CREATE TABLE plans (id UUID DEFAULT gen_random_uuid() PRIMARY KEY, host_id UUID REFERENCES profiles(id), title TEXT NOT NULL, category TEXT NOT NULL, -- 'cafe', 'concert', 'sports', 'hike' target_capacity INT NOT NULL, -- e.g. 4 for cafe, 6 for concert current_capacity INT DEFAULT 1, venue_name TEXT NOT NULL, venue_lat DOUBLE PRECISION, venue_lng DOUBLE PRECISION, event_time TIMESTAMPTZ NOT NULL, status TEXT DEFAULT 'OPEN', -- 'OPEN', 'LOCKED_CHAT_ACTIVE', 'COMPLETED' women_only BOOLEAN DEFAULT FALSE); CREATE TABLE messages (id UUID DEFAULT gen_random_uuid() PRIMARY KEY, plan_id UUID REFERENCES plans(id), sender_id UUID REFERENCES profiles(id), content TEXT NOT NULL, created_at TIMESTAMPTZ DEFAULT NOW());
```

6. PostgreSQL Auto-Unlock Function & Trigger (The Game Engine)

AUTO-TRIGGER

```
-- Automatically unlocks chat when capacity is full or fast-unlocked CREATE OR REPLACE FUNCTION check_plan_capacity_and_unlock() RETURNS TRIGGER AS $$ BEGIN IF NEW.current_capacity >= NEW.target_capacity THEN UPDATE plans SET status = 'LOCKED_CHAT_ACTIVE' WHERE id = NEW.id; END IF; RETURN NEW; END; $$ LANGUAGE plpgsql; CREATE TRIGGER trigger_plan_auto_unlock AFTER UPDATE OF current_capacity ON plans FOR EACH ROW EXECUTE FUNCTION check_plan_capacity_and_unlock();
```

7. Native Hardware Hooks (React Native / Expo Libraries)

NATIVE APIS

1. Biometric Face ID / Fingerprint Auth

```
import * as LocalAuth from 'expo-local-authentication'; const res = await LocalAuth.authenticateAsync({ promptMessage: 'Confirm identity to join plan' });
```

2. 1-Tap SOS Live Location Share

```
import * as Location from 'expo-location'; const loc = await Location.getCurrentPositionAsync({}); // Sends live coords & attendee names to emergency contact
```

8. VibeCoder Quick Build Sequence (Build in 48 Hours)

ACTION STEPS

Step 1: Run `npx create-expo-app` with NativeWind & TypeScript.

Step 2: Paste Supabase SQL schema & setup free Supabase project.

Step 3: Build the 5 simple screens with 4-tab bottom navigation.

Step 4: Connect Supabase Realtime channel for instant chat unlock.
